The vision of Kasavuori school.

The elementary education in Kauniainen prepares children and youngsters for the future

We bring up children and youngsters who feel positive towards change, who have the will and ability to learn new things and put new procedures into practise.

We encourage them to find their own path towards happiness and fulfilling their own dreams.

We encourage them to be persistent by doing and trying things in a determined way.

Curriculum reform 2016

Enhancing the joy and meaningfulness of learning and the active role of students

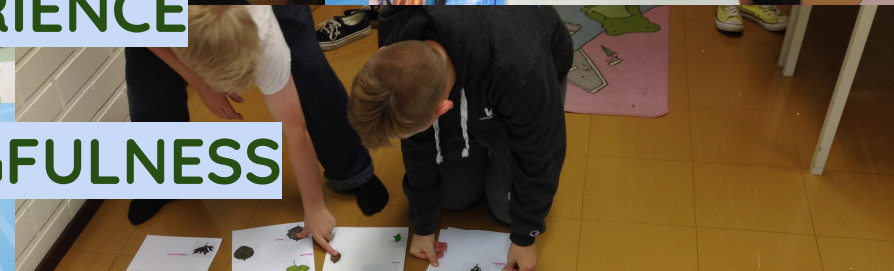

Challenges of the future will be tackled by strengthening seven areas of transversal /cross-curricular competencies which are implemented through the individual subjects

OPH2016

**BASED ON ONE'S OWN
EXPERIENCE**

MEANINGFULNESS

JOY OF LEARNING

The learning environment...

a personal device

DESIGN YOUR OWN STYLE

Unelma koulu

Curriculum reform 2016

Focus on team work, communication skills, critical thinking, sustainability and health and other transversal competences

Schools are expected to renew their pedagogics to become learning communities

Multidisciplinary learning modules (LM) will be used as new obligatory tools for teaching and learning

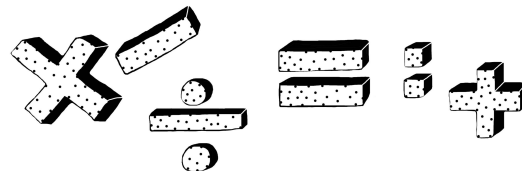

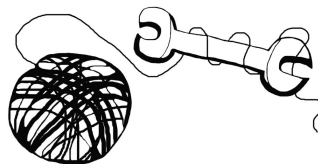

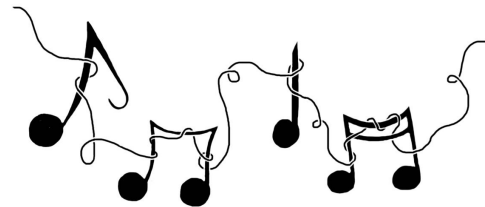

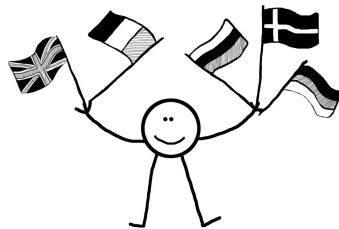

Multidisciplinary learning modules

- In Kasavuori students are entitled to two integrative, multidisciplinary learning modules every school year
- Learning modules integrate skills and knowledge of various school subjects, teachers work together
- Students participate in the planning of these modules

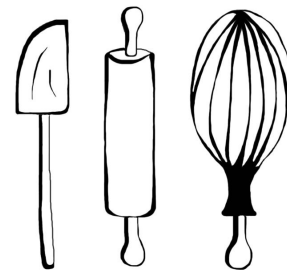

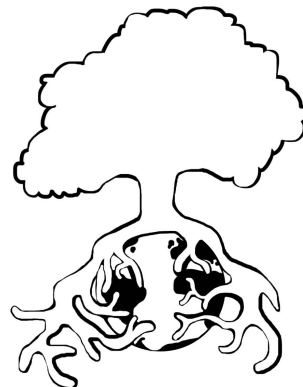

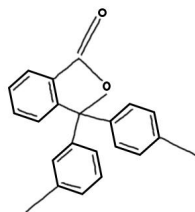

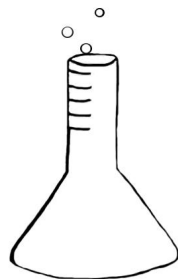

- Goals, content and ways of working are planned and decided at the local level
 - They should be interesting and meaningful from the students point of view
 - They realize the principles of the school culture
 - They realize the academic theme of the school year
 - They promote the development of transversal competencies (eg. digital competence, communication, multiliteracies)

Examples:

7th graders:
Doing well / Well
being

8th graders:
Europe-project and
MediaMonth

9th graders:
Entrepreneur-project
and My roots
